ABSTRACT

In this memo the Global Survey Group* recommends that CIA state that it considers the [redacted] Revised Final as an excellent appreciation. The B/Eastern Europe and B/Western Europe comments on the above, though, are considered irrelevant. The memo says that the B/EE and B/WE comments do not say anything that the [redacted] are not already aware of and preposes that since the U.S. JCS pay attention only to broad implications and not detail, the comments will not be of interest to them.
